**FOR IMMEDIATE RELEASE**

**October 23, 2018**

### **EBE TECHNOLOGIES HAS BEEN NAMED TO THE FREIGHTWAVES FREIGHT.TECH 100**

#### **The List Honors the Companies Bringing Innovative Technologies to the Freight Industry**

**East Moline, IL** – EBE Technologies, the leader in transportation-specific workflow and business process management applications, is proud to announce that it has been named to the prestigious FreightWaves list of innovative companies, the [Freight.Tech 100](#).

The Freight.Tech 100 is designed to recognize the most innovative and disruptive companies in the industry. The companies and their technologies nominated for the Freight.Tech 100 included solutions focused on artificial intelligence, blockchain, digital brokerage, and more. From the more than 500 nominations submitted, the FreightWaves Research Institute, in collaboration with the FreightWaves editorial staff, selected the top 100 candidates deserving of this award. In addition to EBE Technologies, other companies on the list include Amazon, Cummins, Daimler AG, Dock411, FedEx, FleetAdvantage, MercuryGate, Spireon, and Uber Freight.

EBE was nominated specifically for its fleet mobility solution, [Connect Mobile Capture \(CMC\)](#), which is changing how transportation companies manage their business and interact with their drivers. CMC is more than just a mobile document capture application; it is a strategic mobility solution positioning companies to automatically bill within minutes, rather than days, of delivering loads – thus offering a significant opportunity to improve cash flow, positively impact profitability, and improve driver retention.

“We are honored to be listed among the Freight.Tech 100 companies that are recognized as innovators in the freight industry,” said Larry Kerr, president of EBE. “We are dedicated to helping companies improve operational efficiencies, enhance customer satisfaction, and improve profitability by delivering innovative business process management solutions to the transportation and logistics industry.”

“We’re more than pleased with the caliber of companies nominated,” said Arlen Stark, FreightWaves’ EVP of Research. “We very much appreciate everyone who took the time to nominate their company or another company that they think is innovative.”

The 100 companies will now go on into a second level of competition to become part of the elite Freight.Tech 25, which will be announced at the [MarketWaves18](#) conference on November 12-13 at the Gaylord Texan Resort & Convention Center in Grapevine, Texas.

#### **About EBE Technologies, Inc.**

EBE is the leading provider of Transportation Specific Content and Process Management Applications. Serving over 600 clients, EBE has made a positive impact throughout organizations in the areas of billing, settlements and accounts payable; recruiting, onboarding, safety, risk and training; carrier management, fleet maintenance and mobile and data capture.
