## ***Media Release***

**FOR IMMEDIATE RELEASE**  
**October 29, 2018**

### **INFOSTREAM, AN EBE COMPANY, ANNOUNCES THE LAUNCH OF ITS MANAGED SERVICE ORGANIZATION TO PROVIDE TRANSPORTATION REGULATORY AND COMPLIANCE SERVICES**

#### **New Company Will Manage Most Aspects of Regulatory Compliance Including Driver Qualification Files, Drug and Alcohol Programs, DOT Physical Scheduling, Asset Management and Risk Management Consulting**

**Austin, TX** – EBE Technologies, the leader in transportation-specific workflow and business process management applications, today announced that it is launching a new company, InfoStream. As a managed service organization, InfoStream will provide management services for regulatory compliance to companies governed by transportation regulations and compliance requirements. InfoStream is leveraging EBE's leading edge driver management technology solutions to ensure that both regulatory compliance and company-specific needs are met. Through the use of web-based graphical dashboards and mobility solutions, InfoStream will deliver the relevant and timely information to managers and drivers to provide maximum visibility to ensure compliance, mitigate risk and reduce costs.

Service offerings will include managing driver qualification files (pre- and post-onboarding), managing regulatory and company defined drug and alcohol programs, scheduling and monitoring DOT physicals, maintaining vehicle files and scheduling preventive maintenance, as well as providing comprehensive consulting services in areas such as DQ file audits, CSA reviews, mock audits and risk assessment.

Steve Wilhelms was named Executive Vice President and COO of InfoStream. Wilhelms, along with the additional team leadership, offer more than 45 years of combined experience in risk, safety and compliance. InfoStream's management team brings an extensive list of industry-leading partners to ensure that clients will not only receive excellent quality and service, but will be offered the most cost-effective solution.

"Combined with EBE's 45 years of providing innovative technology solutions, InfoStream is positioned to offer a new standard of service, guidance and support to those companies requiring transportation related compliance and safety results," said Larry Kerr, President of EBE.

InfoStream manages all compliance needs with leading-edge technology solutions. The web-based management dashboards provide safety personnel with real-time visibility to information that will ensure fleet safety and compliance, including the management of the driver qualification process from the application phase through post-hire. InfoStream's dashboards provide two-way communication between company management and InfoStream professionals, in which managers can request specific services, reports and driver information directly through the dashboard. To connect with drivers, InfoStream utilizes EBE's Mobile Q fleet mobility solution and the driver portal to deliver timely notifications, allow drivers to submit documents, and keep drivers informed.

"InfoStream's mission is to provide companies with the guidance, service, and support necessary to improve at-risk behaviors, reduce liability, and maintain a safe and compliant fleet. In my experience, I've never seen an organization positioned so well to be able to combine the service, personnel and technology that InfoStream will bring to the table," said Steve Wilhelms.

#### **About EBE Technologies, Inc.**

EBE is the leading provider of Transportation Specific Content and Process Management Applications. Serving over 600 clients, EBE has made a positive impact throughout organizations in the areas recruiting, onboarding, safety, risk, training, mobile document capture, fleet maintenance, carrier management and back office solutions including billing, settlements and accounts payable.
