EBE Vice President Selected as Member of Future Leaders of Tomorrow Program

Honor is part of national trucking trade group's efforts to build a stronger industry

EAST MOLINE, Ill., May 7, 2021 – EBE Technologies Vice President Rocco Marrari, has been chosen for Technology and Maintenance Council's (TMC) Leaders of Tomorrow, Class of 2023. TMC is part of the national trucking industry trade organization, American Trucking Associations (ATA).

According to an email from the ATA, the program "identifies and cultivates the next generation of TMC leaders and advances the needs of the transportation industry through professional development opportunity."

Candidates must be employed by a TMC-member company and been nominated by a TMC member. They must attend four consecutive TMC meetings before graduating from the program in 2023.

Marrari said he's honored to take part in a well-respected program by a leading trucking trade group. "TMC works diligently to improve transport equipment, maintenance, and maintenance management by creating voluntary standards for the trucking industry."

Marrari's program duties include serving as secretary on TMC's new Health Ready Components Task Force.

Marrari joined EBE in 2015 and is currently its vice president of sales, imaging and workflow solutions. He's responsible for business development and customer management of EBE's content and process management software applications.

###

EBE – One Partner. Many Solutions.

EBE provides content and process management software applications for the transportation industry throughout the United States and Canada. Through its paperless, mobile-enabled applications, carriers and logistics providers consistently increase productivity and reduced costs in the areas of billing and accounts receivable, accounts payable, recruiting, mobile capture, safety and risk, and asset maintenance.
